Until Wednesday (21/4), Second Dose of Covid-19 Vaccination Has Reached More Than 6.3 Million

Corona vaccination in Indonesia continues. According to the data listed on the official website of the Covid-19 Task Force, as of April 21, 2021, the number of first vaccinations in Indonesia has increased by 167,992. With this addition, the total number of first vaccinations has reached 11,269,213. The addition of data for the second vaccination was 190,116. This means that the total number of second vaccinations in Indonesia reached 6,322,003. The first vaccination is the first dose vaccination. Meanwhile, the second vaccination is the second dose of vaccination. For the record, the Government of Indonesia has set a total target for Covid-19 vaccination of 181,554,565. When compared with the total Covid-19 target, it means that until Wednesday, April 21, 2021, the first dose of vaccination will reach 6.21%. Meanwhile, the second dose of vaccination rate in Indonesia has only reached 3.48%.

BI Plans to Form Islamic Boarding School-Based Economic Association Holding due to its Great Potential

Bank Indonesia (BI) plans to form a holding of Islamic boarding school (Pesantren)-based economic and business associations holding which is believed to be a big business. BI Senior Deputy Governor, Destry Damayanti, said the great business potential is reflected in the large community of Islamic boarding schools in Indonesia. "There are no less than 27,722 Islamic boarding schools and there are 4 million students scattered around. This makes pesantren a strategic force to become a key player in the halal industry, supporting the national economy," said Destry. In the future, the pesantren business holding will be a combination of business units operating from many Islamic boarding schools in nearby areas. This is in line with BI which wants to strengthen the implementation of policies in order to increase the corporatization of MSMEs, including Islamic boarding school business units through the concept of corporatization.

EU: 70% of Adults Will be Vaccinated in Mid-July

The European Union (EU) said the number of Covid-19 vaccine doses available is enough to vaccinate 70% of the adult population by mid-July 2021. A senior official said Tuesday (20/4), this is possible because vaccine production is currently increasing. "Fifty-three factories produce vaccines in the EU. Our continent is now the largest producer in the world after the United States (US)," EU Internal Market Commissioner Thierry Breton told French daily Le Figaro, Tuesday (20/4). Breton said it was now sure how many doses were currently being produced. He also claimed to know how many million doses to be sent each week. "This allows me to assure you that by mid-July we already have the number of doses needed to vaccinate 70% of the EU adult population," he said.
