Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced August 2024 deflation at -0.03% MoM (vs consensus inflation +0.00%, -0.18% in July 2024). On yearly basis, inflation was at +2.12% YoY (vs consensus inflation +2.10%, +2.13% in July 2024). Core inflation was printed at +2.02% YoY (vs consensus inflation +2.00%, +1.95% in July 2024). The monthly deflation was contributed by the lower price of food group. The BI Board of Governors agreed in their meeting on 20-21 August 2024 to hold the BI-Rate at 6.25%, while also maintaining the Deposit Facility (DF) rate and Lending Facility (LF) at 5.50% and 7.00% respectively. This decision is consistent with the pro-stability focus of monetary policy, namely as a pre-emptive and forward-looking measure to maintain inflation within the 2.5%±1% target corridor in 2024 and 2025. Rupiah was strengthening against USD by +5.04% from 16,294 at the end of July 2024 to 15,473 at the end of August 2024. The strengthening of the Rupiah was impacted by the release of several US Macro data, which show that the US labor market is cooling down. It has fueled investor's expectations of a more aggressive rate cut by the FED this year. Indonesia's trade balance recorded a surplus amounting to USD +472mn in July 2024 vs the previous month's surplus of USD +2,395mn in June 2024. The lower trade surplus was impacted by acceleration of import growth outpace export growth in July 2024. Non-oil and gas trade balance in July 2024 recorded a surplus of USD +2,607mn, which was lower than the previous month recorded a trade surplus amounting to USD +4,434mn in June 2024. Meanwhile, the oil and gas trade balance still recorded a deficit of USD -2,135mn in July 2024, which was higher than the deficit in June 2024, amounting to USD -2,039mn. Indonesia recorded an account deficit of USD -3.02 billion in Q2 of 2024, up from a Current Account Deficit of USD -2.50 billion in the same period the previous year. This deficit accounts for -0.88 percent of the country's GDP. The deficit was driven by a higher service balance deficit, which was USD -5.15bn in Q2 of 2024 from USD -4.60bn in Q2 of 2023. Indonesia's official reserve assets position amassed USD 150.2 billion as of the end of August 2024, increased from USD 145.4 billion as of July 2024. The increase was impacted by several factors, including tax and service receipts, oil and gas export receipts, as well as government's foreign loan withdrawal.

IDR Government bond yields were lower across all the curves in line with IDR Appreciation and offshore inflow. The bullish sentiments came from the global impact of releasing several US macro data that indicate a loosening labor market, and inflation has started to approach around 2.00% level. One indicator, the US Unemployment rate tickling up to a level of 4.30%, has a rising expectation of a more aggressive rate cut this year as it gives concern about the rising potential US recession. Also, Jerome Powell's comment in Jackson Hole about the Fed's cut policy has made the expectation that the Fed would start cutting its rate in September 2024. Indonesia's fiscal balance still show stability and resilience. 7M24 state budget realization recorded good performance with manageable government spending, while government revenue still remains high. Indonesia's fiscal balance recorded a deficit of IDR -93.37tn (7M23: IDR +153.68tn) or -0.41% (prev: +0.74% 7M23) of GDP in 7M24. Offshore accounts increased their holding by IDR +39.24tn in August 2024 (+4.83% MoM), from IDR 813.07tn as of 31 July 2024 to IDR 852.31tn which brought their holding increased to 14.49% of total outstanding tradable government bond (from 14.00% in the previous month). The 5Y yield August 2024 ended -20bps lower to +6.53%(vs +6.73% in July 2024), 10Y tenor ended -26bps lower at +6.64%(vs +6.90% in July 2024), 15Y tenor ended -33bps lower to +6.71% (vs +7.04% in July 2024) and 20Y tenor ended -26bps lower to +6.81% (vs +7.07% in July 2024).
