### Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Aug 2021 inflation at +0.03% mom (vs consensus inflation +0.03%, +0.08% in July 2021). On yearly basis, inflation was +1.59% yoy (vs consensus inflation +1.60%, +1.52% in July 2021). Core inflation was printed at +1.31% yoy (vs consensus inflation +1.30%, +1.40% in July 2021). The lower monthly inflation was contributed by the deflation on volatile food group (lower prices of chicken and various horticulture) and the slowing down of the inflation on administered price group (chicken, and various horticulture). The BI Board of Governors agreed on 17-18 Aug 2021 to hold the BI 7-Day Reverse Repo Rate to be 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates to be 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah appreciated against USD by +1.07% from 14,462 at end of July 2021 to 14,306 at end of Aug 2021. Indonesia's trade balance recorded surplus amounting to USD 2,589mn in July 2021 vs previous month surplus USD +1,316. The higher monthly trade surplus was caused by the lower imports number, especially on capital goods imports on the back of social restriction. While, the exports number was actually slowing down on the back of lower demand of iron and steel export from China. Even though, the CPO exports was increasing. Non-oil and gas trade balance in July 2021 recorded surplus USD +3,384mn, which was higher than the previous month that recorded trade surplus amounting to USD +2,382mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -795mn in July 2021, which was lower than the deficit in June 2021 amounting to USD -1,066mn. Indonesia's official foreign reserve in the end of Aug 2021 was at USD 144.80bn, higher than July 2021 number at USD 137.3billion due to additional fund from IMF for Special Drawing Rights (SDR) allocation amounting to USD 6.31bn.

The JCI ended the month higher at 6,150.30 (+1.32% MoM). Market movers were BBCA, BBRI, ASII, BMRI and TLKM as they rose 9.72%, 5.93%, 10.70%, 7.02%, and 4.94% MoM respectively. Global stock markets strengthened in August, despite still relatively highly volatile from the beginning to the middle month period as geopolitical tension rise from Afghanistan and China. In addition, rising daily new Covid-19 cases globally and continuing market concerns over the outcome of the FOMC Meeting also fueled volatility. However, the dovish statement that came from Jerome Powell during the Jackson Hole symposium helped to build investors' confidence towards risky assets such as equities. Looking domestically in Indonesia, the country's daily Covid-19 cases and Covid-19 positivity rate has fallen quite significantly in August, which prompted the government to begin easing mobility restrictions, particularly in the Greater Jakarta area. On the vaccination progress, Indonesia continues to increase its daily vaccination rate, which now stands at above 1 million doses per day. The improvement in these two parameters has resulted in increasing foreign inflows into JCI in August. Market wise, the JCI currently trades at 2022 earnings multiple of 15x, which is still below its mean and considering the already low foreign investors positioning combined with improvement in economic activity in 3Q21 and upcoming technology company IPOs, we believe this will improve investors' appetite in Indonesian stock market going forward. Sector wise, the Industrial Sector was the best performing sector during the month, gaining 7.42% MoM. Ticker wise, LABA (Ladangbaja Mumi) and MFMI (Multifiling Mitra) were the movers, appreciating 50.00% and 30.71% MoM respectively. This was followed by the Financial Sector which rallied 3.24% MoM. Ticker wise, IMJS (Indomobil Multi Jasa) and BBYB (Bank Neo Commerce) posted 81.03% and 80.95% MoM gains respectively. On the other hand, the worst sector during the month was the Technology Sector, which recorded a decline of 6.32% MoM. Ticker wise, KIOS (Kiosan Komersial) and EMTK (Elang Mahkota Teknologi) were the laggards, which fell 21.80% and 21.09% MoM respectively.
