Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced December 2023 inflation at +0.41% MoM (vs consensus inflation +0.51%, +0.38% in November 2023). On yearly basis, inflation was at +2.61% YoY (vs consensus inflation +2.74%, +2.86% in November 2023). Core inflation was printed at +1.80% YoY (vs consensus inflation +1.86%, +1.87% in November 2023). The higher inflation MoM was contributed by the higher price of transportation group. The BI Board of Governors agreed in their meeting on 20-21 December 2023 to hold the BI 7-Day Reverse Repo Rate at 6.00% and also held the Deposit Facility (DF) and Lending Facility (LF) rates at 5.25% and 6.75%, respectively. In total, Bank Indonesia had increased their benchmark rate by 250bps up to Dec 2023. The decision remains consistent with the pro-stability focus of monetary policy, namely to strengthen rupiah stabilization policy, and as a pre-emptive and forward-looking measure to maintain inflation within the 2.5%±1% target corridor in 2024. Rupiah strengthen against USD by +0.3% from 15,484 at end of November 2023 to 15,439 at end of December 2023. The strengthened Rupiah was impacted by the Fed keeping the Fed Rate in the December meeting and the effect of the weakening trend of the US Dollar Index as there are some indications that the Fed will be more dovish in 2024. Indonesia's trade balance recorded surplus amounting to USD +2,412mn in November 2023 vs previous month surplus USD +3,474mn in October 2023. The lower trade surplus was impacted by imports still having positive growth, but exports recorded negative growth in November 2023. Non-oil and gas trade balance in November 2023 recorded surplus USD +4,618mn, which was lower than the previous month that recorded trade surplus amounting to USD +5,310mn in October 2023. Meanwhile, oil and gas trade balance still recorded deficit to USD -2,206mn in November 2023, which was higher than the deficit in October 2023 amounting to USD -1,836mn. Indonesia's official reserve assets position amassed USD 146.4 billion as of the end of December 2023, increased from USD 138.1 billion as of November 2023. The increase was impacted by foreign loan withdrawals by the Government, as well as tax and service receipts.

The JCI ended the month higher at 7,272.80 (+2.71% MoM). Market movers were TPIA, BBRI, BBKA, BREN and TLKM as they rose +77.97%, +8.53%, +5.24%, +8.73%, and +5.05% MoM respectively. Global equities rallied further in December as data showed U.S. inflation cooled further in November, cementing expectations that the Federal Reserves would cut interest rates in March 2024. Domestically in Indonesia, the JCI also ended the month higher (+2.71% MoM) driven by combination of Fed rate cut hopes as well as more fiscal spending by the government as we are nearing the presidential election, which is anticipated to boost the country's economic growth. Sector wise, the Basic Material Sector was the best performing sector during the month, gaining +6.62% MoM. Ticker wise, TPIA (Chandra Asri Petrochemical) and TBMS (Tembaga Mulia Semanan) were the movers, appreciating +77.97% and +37.82% MoM respectively. This was followed by the Energy Sector which rallied +4.05% MoM. Ticker wise, AIMS (Akbar Indo Makmur) and ITMA (Sumber Energi Andalan) posted +102.83% and +76.93% MoM gains respectively. On the other hand, the worst sector during the month was the Transportation and Logistic Sector, which recorded a decline of -5.33% MoM. Ticker wise, DEAL (Dewata Freight international) and MITI (Mitra Investindo) were the laggards which fell -80.00% and -25.78% MoM respectively.
