Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced March 2021 inflation at +0.08% mom (vs consensus inflation +0.12%, +0.10% on Feb 2021). On yearly basis, inflation was +1.37% yoy (vs consensus inflation +1.40%, +1.38% on Feb 2021). Core inflation was printed at +1.21% yoy (vs consensus inflation +1.44%, +1.53% on Feb 2021). The lower inflation in March 2021 was caused by the lower core inflation. The decline in core inflation was mainly driven by deflation in auto commodities in line with the provision of incentives to reduce the Sales Tax on Luxury Goods (PPnBM) rates for certain motor vehicles and deflation in the gold jewelry commodity that continued in line with the slowing of global gold inflation. The BI Board of Governors agreed on 17-18 March 2021 to hold the BI 7-Day Reverse Repo Rate to be 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates to be 2.75% and 4.25%, respectively. This policy is in line with lower inflation expectation, stable Rupiah currency, and also to push the economic recovery. Rupiah depreciated against USD by -2.41% from 14,229 at end of Feb 2021 to 14,572 at end of March 2021. Indonesia's trade balance recorded surplus amounting to USD +2,010mn in Feb 2021 vs previous month surplus USD +1,959mn. The support for trade surplus were still coming from higher export of iron and steel to China, and also the increment of vehicle export to ASEAN and Japan. Non-oil and gas trade balance in Feb 2021 recorded surplus USD +2,445mn, which was lower than the previous month that recorded trade surplus amounting to USD +2,627mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -443mn in Feb 2021, which was lower than the deficit on Jan 2021 amounting to USD -668mn. Indonesia's official foreign reserve as of March 2021 was at USD 137.1 billion, lower than February 2021 number at USD 138.8 billion. The lower of foreign reserve was caused by the external government debt payment.
