### Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced December 2020 inflation at +0.45% mom (vs consensus inflation +0.37%, +0.28% in Nov 2020). On yearly basis, inflation was +1.68% yoy (vs consensus inflation +1.61%, +1.59% in Nov 2020). Core inflation was printed at +1.60% yoy (vs consensus inflation +1.67%, +1.67% in Nov 2020). The increment of inflation is only contributed by the inflation on food, beverage and tobacco group, while there was still weak demand on other group which was impacted by lower of purchasing power, affected to the lower core inflation. The BI Board of Governors agreed on 16-17 December 2020 to hold the BI 7-Day Reverse Repo Rate at 3.75%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 3.00% and 4.50%, respectively. This policy was in line with the inflation expectation remain low, maintain external stability, and to accelerate the economic recovery. Rupiah appreciated by +0.16% from 14,128 at end of November 2020 to 14,105 at end of December 2020. Indonesia's trade balance recorded surplus amounting to USD +2,612mn in Nov 2020 vs previous month surplus USD +3,607mn. The increment of CPO prices is still be the main contributor to the higher export number. The other reason is the increment of export volume of iron & steel to China. Non-oil and gas trade balance in Nov 2020 recorded surplus USD +2,935mn, which was lower than the previous month that recorded trade surplus amounting to USD +4,057mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -323mn in Nov 2020, which was lower than the deficit on Oct 2020 amounting to USD -450mn.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits and would seek the opportunity to buy high rating corporate bonds with maturity under 1Y.
